PROFESSIONAL SUMMARY

Software Engineering undergraduate at Daffodil International University who builds full-stack web platforms end-to-end — from real-time IoT dashboards to marketplace and community platforms. Aiming to grow as a Software Engineer focused on building AI-driven software products, combining full-stack development with practical AI/LLM integration. Comfortable owning a project across design, architecture, and implementation.

SKILLS

Languages: JavaScript, TypeScript, Python, C++, Go, PHP, SQL

Frontend: React.js, Next.js, React Native, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Flask, REST APIs, Firebase

Databases: PostgreSQL, MongoDB, MySQL, Vector Databases (semantic search)

DevOps & Tools: Docker, NGINX, Linux, Git, VPS Management, CI/CD, Expo, Google Play & App Store deployment

AI/ML: LLM APIs, RAG Pipelines, Vision APIs, Semantic Search, Multimodal Models

PROFESSIONAL EXPERIENCE

Software Engineer — Penguin 2024 – Present

- Built a food delivery web application as part of the team's product lineup
- Developed “Club Connect,” a platform linking club members across university departments
- Built a marketplace web application for buying and selling musical instruments

PROJECTS

AgroSync *Personal Project*

Real-time smart irrigation dashboard for an ESP32-based smart agriculture system

Live Link

- Streamed real-time sensor data (soil moisture, temperature) from ESP32 devices via MQTT and Socket.IO for live monitoring
- Enabled remote irrigation control, letting users trigger watering cycles directly from the dashboard
- Logged historical sensor data in PostgreSQL for trend visualization and analysis
- Built a type-safe full-stack data pipeline using Next.js, Express, and Prisma

Club Connect *Personal Project*

Centralized hub connecting university clubs across departments

Live Link

- Built a department-wise club directory so students can browse and discover clubs in one place
- Designed club profile pages with events, announcements, and member information
- Streamlined site navigation and structure for fast club discovery
- Built with Next.js, Express, TypeScript, Prisma, and PostgreSQL for a scalable architecture

FixItNow *Personal Project*

Home services marketplace connecting users with technicians for household repair bookings

Live Link | GitHub

- Enabled users to browse and search technicians by service category and availability
- Built a booking and scheduling flow for home service appointments
- Implemented fast, cached data fetching with TanStack Query for a responsive browsing experience
- Delivered a responsive, mobile-friendly UI with Next.js, React, TypeScript, and Tailwind CSS

EDUCATION

BSc in Software Engineering Jan 2024 – Dec 2027 (Expected)

Daffodil International University — Daffodil Smart City, Ashulia, Dhaka | CGPA: 3.40/4.00

EXTRA-CURRICULAR ACTIVITIES

- DIU Unlock the Algorithm Programming Contest – Spring 26 (Final) — Participant, invite-only ICPC-regional-style contest organized by Daffodil International University

LANGUAGES

Bangla — Native English — Fluent
